Adra Product Studio — Lead Pipeline

Chat Qualification → Lead Scoring

PHASE 1 — QUALIFICATION

START — User Sends Chat Message
Visitor opens the chat widget on the website and types a message.

↓

Lead Qualification AI Agent
GPT-4.1 Mini with 30-message memory receives the message and decides the next action.

↓

Agent Asks for Name & Email
Naturally collects the user's name and email address.

↓

checks user (Tool)
Reads Google Sheets (Sheet1) to check if the email already exists.
Google Sheets – Read

↓

User Exists?

- Yes → Greet as returning user
- No → Greet as new user

↓

Guided Conversation Loop
Agent asks 1–2 questions per turn to collect: Name · Company · Product Idea · Stage · Budget · Timeline · Urgency · Market · KPI · Expectations

↓

update_details (Tool — called every turn)
Silently saves all collected fields to Sheet1, matched by email.
Google Sheets – Append / Update

↓

User Asked
About Adra?

- Yes → get_company_info (Tool) Scrapes adraproductstudio.com
- No → Continue collecting fields

↓

All 10 Fields
Collected?

- No → Loop back — ask next question
- Yes → Proceed to lead tool

↓

lead (Tool)
Triggers the Lead Scoring sub-workflow, passing all 11 fields as input.
Execute Sub-Workflow

↓

Confirm to User
"Our team will reach out within 24 hours." — Phase 1 ends.
